PROFILE

With a Master's degree in Industrial Design specializing in Human-Technology Relations, I have led diverse projects that honed my skills in product design and development. My strong connection to both design and coding allows me to create functional, high-performance solutions tailored to user needs. By bridging the gap between designers and developers, I ensure seamless alignment throughout the product development lifecycle.

PORTFOLIO

2024 – 2025

Product Design Engineer (Web Platform & App) · Figma

I led the design and development of a biomechanical analysis platform tailored for runners and physiotherapists, ensuring it addressed their specific pain points and goals. To truly grasp the complexities of the domain, I took the initiative to dive into biomechanical concepts on my own, learning about gait analysis, motion capture, and injury prevention.

WEARM.AI, ENSCHEDE, THE NETHERLANDS

2023 – 2024

Front-end Developer · Next.js, Tailwind, Headless UI, Node.js

Frontend Integration of Adobe XD prototype interface for a real estate web platform based in NextJS and Laravel. Creation of custom interface components for form manipulation, verification, and submission.

MABRIK'IMMO, PARIS, FRANCE

2023 – 2024

Full-stack Developer · Vue.js, Laravel PHP, Vuetify

Development and management of widgets for a KPI-based intelligent note-taking platform. Integration of new widgets and functionalities for front-end components.

BEESAPPS, PARIS, FRANCE

2020 – 2021

Lead Product Designer · Figma, React Native

I redesigned Knaek's student discount mobile application for a fresher look and a user engagement boost. I studied, ideated, and conceptualized interfaces with UX Research before delivering an interactive prototype for the final concept.

KNAEK & DÉ CODEERBEDRIJF, AMSTERDAM, THE NETHERLANDS

2019 – 2024

Co-founder, Design Engineer · React Native, Next.js, Typescript

As a Lead Design Engineer and Product Designer, I took responsibility for researching and applying user- and business-centered values and requirements to a product concept for our app. I integrated the prototype with the React Native framework for hybrid mobile application development (iOS, Android), and Next.js for developing the back office web platform. My role also extended to the global branding and marketing identity creation for the PocketUp app.

POCKETUP (FR), PARIS, FRANCE

EDUCATION

2018 – 2024

MSc Industrial Design Engineering · Human Technology Relations

UNIVERSITY OF TWENTE, ENSCHEDE, THE NETHERLANDS
